A Message from Governor William Donald Schaefer:

The strength of Maryland is in its diversity. Maryland's geography ranges from the shores of the Atlantic Ocean to the beautiful Chesapeake Bay region to the magnificent mountains of Western Maryland. Maryland also is home to nearly five million people who come from diverse backgrounds.

The 1993-1994 Maryland Statistical Abstract is an invaluable reference tool, the most complete source of information about our great state and its people. Students, business executives, researchers and citizens will find this book a necessary part of any reference library.

We in state government use the Maryland Statistical Abstract as an invaluable resource that helps us formulate policies that affect the quality of life for all Maryland residents. I trust it will be as useful for you.

Sincerely,

A handwritten signature in cursive script that reads "William Donald Schaefer".
Governor

ACKNOWLEDGEMENTS

The Maryland Statistical Abstract is published every other year by the Maryland Department of Economic and Employment Development. The 1993-94 edition was supervised by Irene Tashlick, under the overall direction of Pradeep Ganguly. Zafar Ali, Valarie F. Robinson and W. Christopher Schwartz provided valuable assistance in collecting, organizing, and computerizing the data. Jerry A. Wade organized the computer operations. Linda L. McNeal was responsible for clerical and computer operations.

We thank the many contributors to this volume. Notes below each table credit its sources. Wherever private sector sources are indicated, permission to use such material should be obtained from the cited source.

TRADE ACTIVITY IN MARYLAND, ESTABLISHMENTS WITH PAYROLL: 1987

NOTE: In 1982, classifications were based on the 1972 Standard Industrial Classification (SIC) Manual and its 1977 Supplement. For 1987, classifications are based on the 1987 SIC Manual. There are major revisions to the SIC structure for 1987 which limit the comparability of data between the 1982 and 1987 censuses. It was not possible to retabulate 1982 data based on the revised 1987 SIC's for comparative purposes since, in many cases, the necessary information was not available for assigning the new 1987 classifications to the 1982 records. However, 1987 census records were assigned both a 1987 and 1972 SIC-based classification. This table presents the 1987 data assigned a 1972 SIC-based classification, allowing for comparison with 1982 data.

RETAIL TRADE ACTIVITY IN MARYLAND: NUMBER OF ESTABLISHMENTS, SALES,
AND ANNUAL PAYROLL CHANGE: 1987 AND 1982

NOTE: In 1982, classifications were based on the 1972 Standard Industrial Classification (SIC) Manual and its 1977 Supplement. For 1987, classifications are based on the 1987 SIC Manual. There are major revisions to the SIC structure for 1987 which limit the comparability of data between the 1982 and 1987 censuses. It was not possible to retabulate 1982 data based on the revised 1987 SIC's for comparative purposes since, in many cases, the necessary information was not available for assigning the new 1987 classifications to the 1982 records. However, 1987 census records were assigned both a 1987 and 1972 SIC-based classification. This table presents the 1987 data in two ways: one part according to the 1987 SIC'S, the second shows the 1987 data assigned a 1972 SIC-based classification, allowing comparison with 1982 data.

Note on the Poverty Level:

The poverty level is a designation used by the federal government as one means of identifying areas and persons with income levels so low that some economic hardship is likely to be present. Various levels have been determined depending on family size, number of children, and age of the family householder of unrelated individual. The income cutoffs are updated each year to reflect the change in the Consumer Price Index. The poverty threshold for a family of four was \$12,674 in 1989. In 1991, the national threshold for a family of four was \$13,924.

* The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The index measures price changes from a designated reference date - 1982-84 - which equals 100.0. The change in the index can also be expressed in dollars as follows: for the Baltimore MSA, the price of a base "market basket" of goods and services in the CPI for "All Items" has risen from \$1 in 1982-84 to \$ 1.39 in May 1992.

Note: A small number of lengthy cases can increase an average, particularly in a jurisdiction with a small caseload. For that reason, civil cases over 721 days old, criminal cases over 360 days old, and juvenile causes over 271 days old have been excluded in the above calculations. Approximately 90 to 95 percent of the cases are disposed of within those time periods.

Note: The Maryland total permits shown in this table differ from the totals in the succeeding table showing residential permits by county. The reason for the difference is that the 17,000 universe for the state data in this table was defined in 1984. The table which provides permits data by county includes data from places that began issuing permits since 1984.

Sample taken from a 17,000 Permit-Issuing
